> Generated from the project's records in NetZero at the date and time above: the values recorded against each requirement, the files attached against each required document, and the AI's advisory read of those files. Nothing on this document was typed in by hand. A document reads Provided only when a file is attached against it. This is not a log of dated site inspections; where the manual asks for one, it is among the required documents below and the contractor's own sheets are what is attached there.

AIM

To demonstrate that living accommodation for engaged labor is at par with prevalent laws and reflects basics of health and well-being.

Additional attachments (credit level)

Files supporting the credit as a whole. They do not stand in for a listed document.

Labor-Subsistence-Plan-v2.txt 2 KB · 5 Oct 2026

AI READ · ADVISORY ONLY · PARTIALLY MEETS

The document is a Labor Subsistence Plan developed by the Contractor, outlining health and well-being characteristics for labor accommodation, which aligns with the requirement. However, it is from the design stage and lacks evidence of implementation, photographic proof, or maintenance logs.

– Letter of commitment, signed by building owner, confirming implementation of credit requirement during design stage.
– Implementation of the Labor Subsistence Plan by Contractor detailing all action required and undertaken during construction stage.
– Date-stamped photographic evidence to demonstrate how all elements of compliance defined in the Labor Subsistence Plan have been met or exceeded.
– Maintenance and Inspection logs with information of findings and actions taken to rectify and maintain compliance.

What the manual requires the plan to contain

From the credit's supporting guidance (manual pp.258–261).

Labor Subsistence Plan

In addition, the following criteria need to be met by the accommodation facilities provided for workers of the project at a minimum:

- [ ] Bedrooms:
  - [ ] Provision of adequate accommodation for all construction workers employed on the project with suitable amenities available within safe walking distances. Each worker must be allocated a space of not less than 4m2.
  - [ ] Each worker must be provided with his own sleeping area even in case of shifts.
  - [ ] At a minimum, each worker must be provided with a bed, side table, and a closet with a lock.
- [ ] Sanitary Facilities:
  - [ ] The labor accommodation must be connected to a sanitary drainage (or septic tanks) and potable water system.
  - [ ] Cold and hot water must be provided for faucets and showers.
  - [ ] One shower and one washbasin must be provided for every 5 people.
- [ ] Regular pest control measures must be performed for the full accommodation on site.
- [ ] All rooms, kitchens and dining halls should be provided with ventilation in the form of openable windows and air conditioning.
- [ ] At least 3 of the following amenities must be available as dedicated spaces:
  - [ ] Prayer rooms or mosques
  - [ ] Supermarket
  - [ ] Clinic and pharmacy
  - [ ] Recreational facilities e.g. park with shaded rest areas, and
  - [ ] Access to public transport
- [ ] Service agreement with the Facilities Management Company for maintenance of these facilities and periodic inspections scheduled to be performed annually. These inspections can include and are not limited to water tank cleaning, pest control and air conditioning system servicing.
- [ ] A worker’s representative committee to address any requests, concerns and grievances of the workers regarding security, health and sanitation.

These boxes are left blank on purpose. They list what the manual requires the plan to contain; whether the uploaded plan covers each one is for the reviewer to judge against the document itself.
